

A patented, award-winning dual-flush retrofit device for all siphonic flushing cisterns.

- **Convert your existing toilet**
- **Easy to install – 5 minutes, no plumber needed**
- **Save up to 50% of water use per flush**
- **Independently tested to save 31 litres / day per household**
- **Easy to use**
- **No maintenance**
- **Adjustable reduced flush levels**
- **Lifelong guarantee**

Cisterns account for about 30% of total household water use and most standard pre-2001 cisterns in the UK are single flush models that use up to 13 litres of water per flush.

The Siphon converts standard single-flush siphon valves into a water saving dual-flush unit.

The device works by interrupting the vacuum created when a toilet is flushed, thereby achieving a small flush. Easy to install within a few minutes on nearly any existing cistern water tank, the volume of water in the small flush can also be adjusted to suit system requirements.

Specifically designed for and fitting onto the standard British siphon valve, the conversion retains your existing flushing lever.

It's simple:

Small Flush
Big Flush

Push lever and let go
Push lever and hold for 2 seconds

- A standard UK household will save up to 30% of total water consumption.
- Schools, offices and public buildings can save as much as 40% of total water consumption
- Payback time as little as a few weeks*

Testimonials

“ecoBETA is one of the products we are recommending for large-scale water efficiency trials for domestic and municipal retrofit projects. The product is well-designed, effective and good value for money. ecoBETA can deliver large sustained water savings at a good price, is easy to install and requires little or no maintenance.”

Jacob Tompkins, Director, WATERWISE

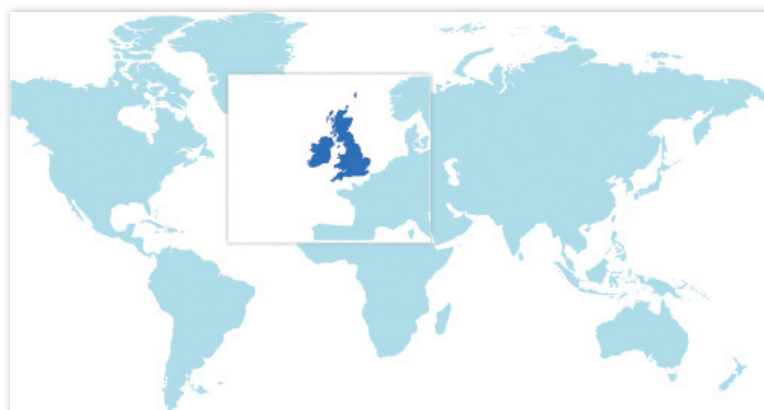

“when all aspects (ease of delivery, cost/benefit, customer take-up and sustainable savings) are considered, ecoBETA is the preferred device”

Jenny Abel, ESSEX & SUFFOLK WATER

“ecoBETA has proven to be a very successful device on all our projects as it is very easy to fit and operate. To date we have not had any major issues with fitting this device. Placing orders with ecoBETA has also been a positive experience. ecoBETA always deliver orders on time and also take the time to listen to our comments and answer any questions we have.”

Michelle Gorssbach, Project Manager, MOUCHELPARKMAN
